EDUCATION

- **The University of Hong Kong (HKU)** — Hong Kong, China
  Research Assistance - Computer Science — *April 2023 - Present*
  Research Interests: *2D/3D AIGC, Large Language Model, Navigation and autonomous driving*

- **Dalian University of Technology** — Dalian, China
  Master and Ph.D. Candidate - Information and Communication Engineering — *July 2021 - Present*
  Research Interests: *Video object tracking and segmentation*

- **Dalian University of Technology** — Dalian, China
  Bachelor - Mechanical Engineering — *Sep. 2017 – July 2021*

PUBLICATIONS

- **PixArt-α: Fast Training of Diffusion Transformer for Photorealistic Text-to-Image Synthesis**:
  Junsong Chen*, Jincheng Yu*, Chongjian Ge*, Lewei Yao*, Enze Xie†, Yue Wu, Zhongdao Wang, James Kwok, Ping Luo, Huchuan Lu, Zhenguo Li
  In submission, ICLR 2024

- **MetaBEV: Solving Sensor Failures for BEV Detection and Map Segmentation**:
  Chongjian Ge*, **Junsong Chen***, Enze Xie*, Lanqing Hong, Zhongdao Wang, huchuan Lu, Ping Luo
  International Conference on Computer Vision (ICCV), 2023

- **ARKitTrack: A New Diverse Dataset for Tracking Using Mobile RGB-D Data**:
  Haojie Zhao*, **Junsong Chen***, Lijun Wang, Huchuan Lu
  (* denotes equal contribution)
  IEEE/CVF Conference on Computer Vision and Pattern Recognition **(CVPR)**, 2023

- **DeepAccident: Motion and Accident prediction Benchmark for V2X Autonomous Driving**:
  Tianqi Wang, Sukmin Kim, Ji Wenxuan, Enze Xie, Chongjian GE, **Junsong Chen**, Zhenguo Li and Ping Luo
  In submission, AAAI 2024

HONORS AND AWARDS

- Outstanding graduates of the Province, 2020-2021
- National scholarship, 2018-2019

EXPERIENCE

- **Noah's Ark Lab, Huawei** — Shenzhen, China
  Research Intern — *Nov. 2022 - Present*
  - **Work Duty**: Conduct researches related to 2D/3D AIGC foundation model and Large language model (LLM).
  - **Project Details**: I am currently working on efficient training of the Text-to-Image foundation model.

- **Honor Device Co. Ltd** — Beijing, China
  School-enterprise cooperation project — *Oct. 2021 - Nov. 2022*
  - **Work Duty**: Conducting research on methods, determining technological routes, innovating algorithms to improve baseline accuracy.
  - **Project Targets**: To achieve the objective of unifying object detection and tracking on mobile devices by combining object detection and ReID algorithms and multi-task techniques are utilized. By using the same backbone, a single inference can accomplish both person detection and feature extraction for ReID.

- **Meitu, Inc** — Xiamen, China
  School-enterprise cooperation project — *Sep. 2021 - Mar. 2022*
  - **Work Duty**: Conducting research on methodology, determining the technical approach, innovating algorithms to improve baseline accuracy, and debugging models on mobile phone.
  - **Project Output**: By abandoning the use of large-scale networks and optical flow as auxiliary components, a satisfactory performance was achieved using only a lightweight network that can be deployed. Our approach allows for real-time model running on mobile phones while maintaining precision without loss and **successfully applied to Meitu APP**.

- **Hangzhou Research Institute, Huawei** — Hangzhou, China
  School-enterprise cooperation project — *Oct. 2020 - Aug. 2021*
  - **Work Duty**: Conducting research on methods, determining technological routes, innovating algorithms to improve baseline accuracy.
  - **Project Output**: The innovation in algorithm implementation methods, as well as the improvement in speed and performance, including detection, tracking and ReID, have been **successfully applied to the road monitoring cameras in Hangzhou's smart city project**.
